THE COMPLETE SOLUTION FOR MANAGING DEBT COLLECTION

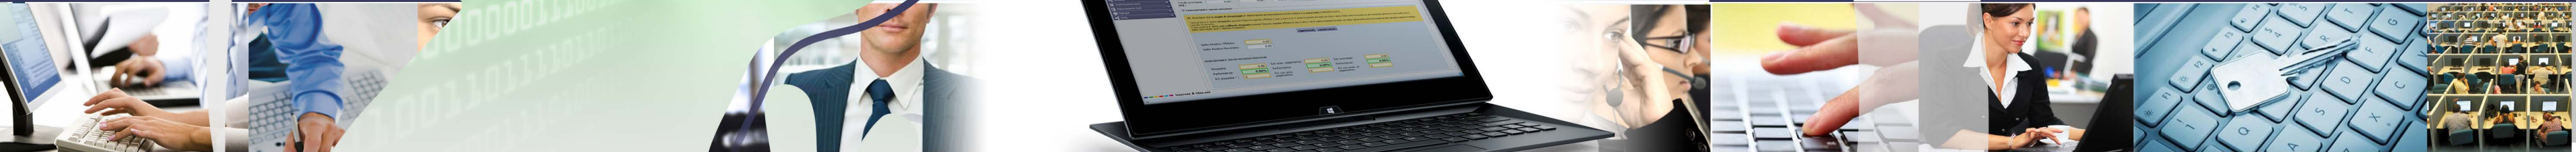

EDITIONS

ON PREMISE

Full featured edition. In addition to all the main features, it is installed on a server that will be hosted on the customer's network.

CLOUD

Full featured edition. This solution suits those structures that do not want to invest in server and IT infrastructure within their headquarters but instead want to rely on our server farm.

SOFTWARE

GE.C.O. represents the new solution for managing online debt collection. Fully designed and developed by an internal team of Internet & Idee, it was conceived to maximize the profitability of collection agencies, ensuring optimal performance along with ease of use. The software is suited for those companies who possess an high number of employees and it benefits from a modular and scalable structure, which is able to handle heavy amount of data.

With this in mind we have designed the software internal interface, which was developed as a single application able to offer all the features requested by the user. GE.C.O. is a web 2.0 solution developed on Java Enterprise technology in a Linux environment, ensuring the highest standards of security, reliability, performance and future additions.

The user who chooses GE.C.O., in addition to reducing management costs, has also the ability to manage multiple positions, monitor the activities of employees and have continuous software updates.

Easy to use and quick in results, GE.C.O. is the ideal ally for all companies involved in debt collection.

MISSION

To support the company in the workflow processes linked to the management of debt collection practices: this is the main objective of the GE.C.O. software, constantly evolving so that the customer is always one step ahead of the competition.
